

Enable & Disable Users

Last Modified on 06/21/2019 10:41 am CDT

You can enable and disable users in your KidKare account, as needed. For example, if a user is no longer employed with you, you can disable their account and prevent them from logging in to KidKare.

Note: You must have appropriate permissions to access this feature.

1. From the menu to the left, click Setup.
2. Click User Permissions.
3. Filter to the user(s) to change:
 - Click  in the top-right corner. In the **Filter By** section, select **Active**, **Inactive**, or both.
 - Use the **Name**, **Email**, **Username**, and **User Type** columns to filter to the user to update.
4. Click  in the **Enable/Disable** column to enable or disable the user. Your changes are saved automatically.

Users

Name	Email	Username	User Type	Enable/Disable
shelly				
Mary Shelly		mshelly
